MEDICAL NEEDS POLICY

**Purpose:** Students are allowed to possess and self-administer asthma medication and diabetes medication, as appropriate, providing certain requirements are met as outlined in Utah State Code Section 53A-11-602 and 53A-11-604, respectively. Appropriate forms are available in the office as developed by the Utah Dept. of Health.

**Policy:** As outlined in Utah State Code Section 26-41-104, at least one or more school personnel shall receive training from a qualified individual regarding the storage and emergency use of an epinephrine auto-injector, as well as all follow-up procedures such as calling 9-1-1 and notifying parents if possible.

Upon receiving a signed statement from a parent/guardian of a student with diabetes certifying that glucagon has been prescribed for the student, the school will appropriately train required personnel in the administration of glucagon, as well as adhere to all related requirements as outlined in Utah State Code Section 53A-11-603.

Students who have particular health concerns will be flagged with a Red Health Alert Folder which is kept in the administration office. This folder will have detailed instructions on the procedures to follow in case of an emergency, as well as any parental permission required. Teachers will receive a copy of these instructions as well. The health concerns of any student who has a Red Health Alert Folder will be discussed with the teachers, office staff, and administration to ensure the child’s needs are met.
