

Getting your Wildcat Mail to your iPhone, iPod w/iOS 4.2.1  
(iOS prior to 4.2.1 should be similar)

1 - On your device go to 'Settings' and select 'Mail, contacts, calendars' button. 2 -

Select 'Add account', then select 'other'.

3 - Click 'Add mail account' and provide the requested information. Note that the address should be your Wildcat Mail address (i.e., [username@mail.weber.edu](mailto:username@mail.weber.edu)). The description is the name the account will have on your iOS device. Be sure to include your password.

4 - The system will find your account and prompt a new screen to display; select iMap.

5 - Set the host name for both incoming and outgoing mail server to [imap.mail.weber.edu](mailto:imap.mail.weber.edu). When prompted for username/password, provide your Wildcat account credentials.

6 - If you get an error about verifying server identity, hit the continue button.

7 - Once the synchronization is complete, make sure that mail is turned 'on', and hit the 'save' button.

Voila! You will now be able to access your Wildcat Mail on your iPhone or iPod Touch.
