Offset your Carbon Footprint by Donating to WSU’s Renewable Energy Fund

1. Go to www.weber.edu/give

2. Click in the middle purple box where it says "click here to make an online gift"

3. In the first drop down box select "facilities management"

4. In the next drop down box select "campus initiatives" (it's the only thing you can select)

5. Then select "carbon offset gift account"

6. How much should you donate? Whatever you wish. Current research shows that the average price for carbon offsets is approximately $14.00 per metric ton of CO₂. You can offset a portion (i.e. just transportation) or all of your impact. Or, you can just donate what you are able. Every little bit helps!
