# Environmental Health & Safety at WSU

WSU is committed to providing a safe and healthful environment for all students, faculty, staff and visitors. The Environmental Health and Safety (EH&S) office embodies that commitment.

EH&S provides programs to protect the health and safety of all people on the university campus and the environment, and to ensure compliance with applicable codes and regulations. EH&S staff responds to individual requests for assistance in areas such as proper chemical handling and disposal, ergonomics, indoor air quality and resolution of a variety of safety concerns. EH&S assists academic and service departments by providing training resources and technical services, interpreting regulations and interfacing with regulatory agencies.

Each one of us is responsible for maintaining a safe and healthful environment at the university. We can each work to prevent accidents, report unsafe conditions, learn safe techniques, obtain necessary training and work within applicable regulations.

EH&S is here to work with you to solve your particular problem, to develop and implement strategies for ensuring health and safety, and to investigate safety and health concerns. Contact EH&S for assistance.

## Major Program Areas

### Occupational Health and Safety

- Asbestos Management
- Bloodborne Pathogens
- State Driver Certification
- Ergonomic Evaluation
- Indoor Air Quality
- Exposure Evaluation
- Heat Stress Control
- Injury Prevention
- Laboratory Safety
