UPDATED DAILY!

Mary Elizabeth Dee Shaw Gallery

Monika Del Bosque
Gallery Director, Department of Visual Arts
Weber State University

Monika Del Bosque is the Gallery Director of the Mary Elizabeth Dee Shaw Gallery and adjunct faculty in the Department of Visual Arts. A recent transplant from California, she graduated with an MFA in Studio Arts and a Certificate in Museum Collections Management from John F. Kennedy University in Berkeley, CA. A little known fact is that she also received a Certificate in Dream Studies, used to lead dream groups, and served on the art committee for the Bay Area Region of the International Association for the Study of Dreams! Prior to her work at WSU, Ms. Del Bosque had her own contract registrar business called “Behind the Scenes Fine Art Services”. Some her clients were International Technological University and the Silicon Valley JCC, in addition to numerous private collectors. In her “spare time”, she is learning how to ice skate, enjoys Early Music and playing the cello, and has an active exhibition schedule of her own art.

WSU’s Art Gallery is a space designated for the exhibition of works of art which exemplify ideas and values that are taught as part of the University’s curriculum in art. The Gallery Director organizes at least six exhibitions each year and these include work by local, regional and nationally recognized artists. The Gallery program also serves a vital role in the cultural life of the community. All exhibitions are free and open to the public, and, for the convenience of the public, the Gallery is also open weekday evenings until 6pm and until 9pm in conjunction with the City of Ogden’s First Friday Gallery Stroll.

The Mary Elizabeth Dee Shaw Gallery is an impressive space. If you haven’t visited it yet, it is well worth the walk to the Kimball Visual Arts Center. For the coming exhibition year, the gallery will be exhibiting a national juried exhibition of female artists who depict the male

nude, and is excited to host an exhibition of new work by Vietnamese artist, Binh Danh, in early 2008. Look forward to these exhibitions along with the 3rd Annual High School Art Juried Exhibition as well as the annual Student and BFA Thesis Exhibitions. For more information about exhibitions and visiting artists, please visit their website at: dova.weber.edu

A New Face in OSP

Christee Kyte has joined the OSP team. Time and Effort reporting is a hot audit item right now. Christee helps Payroll get time and effort reports out and back to Accounting.

She is currently attending WSU and majoring in Communication.

For each petal on the shamrock
This brings a wish your way-
Good health, good luck, and happiness
For today and every day.

National Science Foundation Funding Opportunities

Agency: National Science Foundation
Next Deadline: April 11, 2007
Synopsis: Will establish a national digital library to create an online network of learning environments and resources for STEM education at all levels. Three tracks: Pathways projects provide stewardship for content and services; Services projects provide user/provider support and enhance impact, efficiency, & value of the library; & Targeted Research projects (not supported in FY 07). Small grants extend or enhance results from existing activities. Optional letters of intent due 3/14/07.

Agency: National Science Foundation
Next Deadline: May 10, 2007
Synopsis: Supports broad-based, community-initiated, upper atmospheric research. Goal is to understand behavior of atmospheric regions from the middle atmosphere upward through the thermosphere & ionosphere into the exosphere in terms of coupling, energetics, chemistry, & dynamics on regional & global scales. Activities should combine observations, theory, & modeling

Gallery Hours:
Monday - Friday: 11:00am - 6:00pm
Saturday: 12:00pm - 5:00pm
Sunday: Closed
Agency: National Science Foundation  
**Next Deadline:** July 12, 2007  
**Synopsis:** Notice seeking proposals for research aimed at understanding how interacting developmental processes give rise to the emergent properties of organisms  

Agency: National Science Foundation  
**Next Deadline:** May 25, 2007  
**Synopsis:** Supports research that enables radical improvements in learning through innovative computer & information technologies, & advances research in computer science, information technology, learning, & cognitive science through the unique challenges posed by learning environments & learning technology platforms. Integrative research approaches that build across disciplines & establish tight linkages among theory, experiment, & design encouraged.

Agency: National Science Foundation  
**Next Deadline:** July 12, 2007  
**Synopsis:** Notice seeking applications that emphasize a systems biology approach to understanding how the nervous system adapts and regulates its function and structure in response to the internal or external environment.  

Agency: National Science Foundation  
**Next Deadline:** April 4, 2007  
**Synopsis:** Supports enhancement of undergraduate education & training at the intersection of biological & mathematical sciences to prepare students to pursue graduate study & careers in fields that integrate these disciplines. Provides long-term research experiences for interdisciplinary-balanced cohorts of at least four undergraduates to expose them to contemporary math & biology, addressed with modern research tools & methods. Must involve students & faculty in research.  

Agency: National Science Foundation  
**Next Deadline:** April 11, 2007  
**Synopsis:** Supports significant increase in number of students receiving postsecondary degrees in computing disciplines, with initial emphasis on women, persons with disabilities, & minorities. Supports: Alliances (proposals due 5/16/07), Demonstrations (proposals due 5/16/07), & Supplements (required letters of intent due 4/11/07, 8/8/07, & 12/12/07 contexts)  

Agency: National Science Foundation  
**Next Deadline:** July 12, 2007  
**Synopsis:** Notice seeking proposals for research on the development, function, mechanisms, and evolutionary history of behavior, with emphasis on a vertically-integrated understanding of the behavioral phenotype.
