

When are you going to get the
BIG PICTURE?

Now, picture yourself blazing
through jobs with **SOLUS™**.

Talk to your Snap-on dealer about SOLUS — and the simplified software bundling options that put more diagnostic power in your hands.

Once you get the big picture, you're going to notice a big difference in the way you work.

Larry's a tech who gets the
BIG PICTURE.

Snap-on

>> Bigger screen. More data. Faster performance.

Taking Scanner™ technology to the next level.

Introducing **SOLUS™** from Snap-on.

Suppose there was a tool that gave you more critical data, faster. And showed you more of that data at one time, so you could make smarter decisions.

Suppose it all came with the world's most advanced automotive diagnostics technology, you could get updates in a flash — and never worry about changing or misplacing cartridges.

Suppose it was a tool so fast and easy to use that it could give you codes and repair tips while competitive products are still booting up.

And suppose it came with everything you need to service Asian Import and Domestic Vehicles — including tens of thousands of real world repair tips — standard.

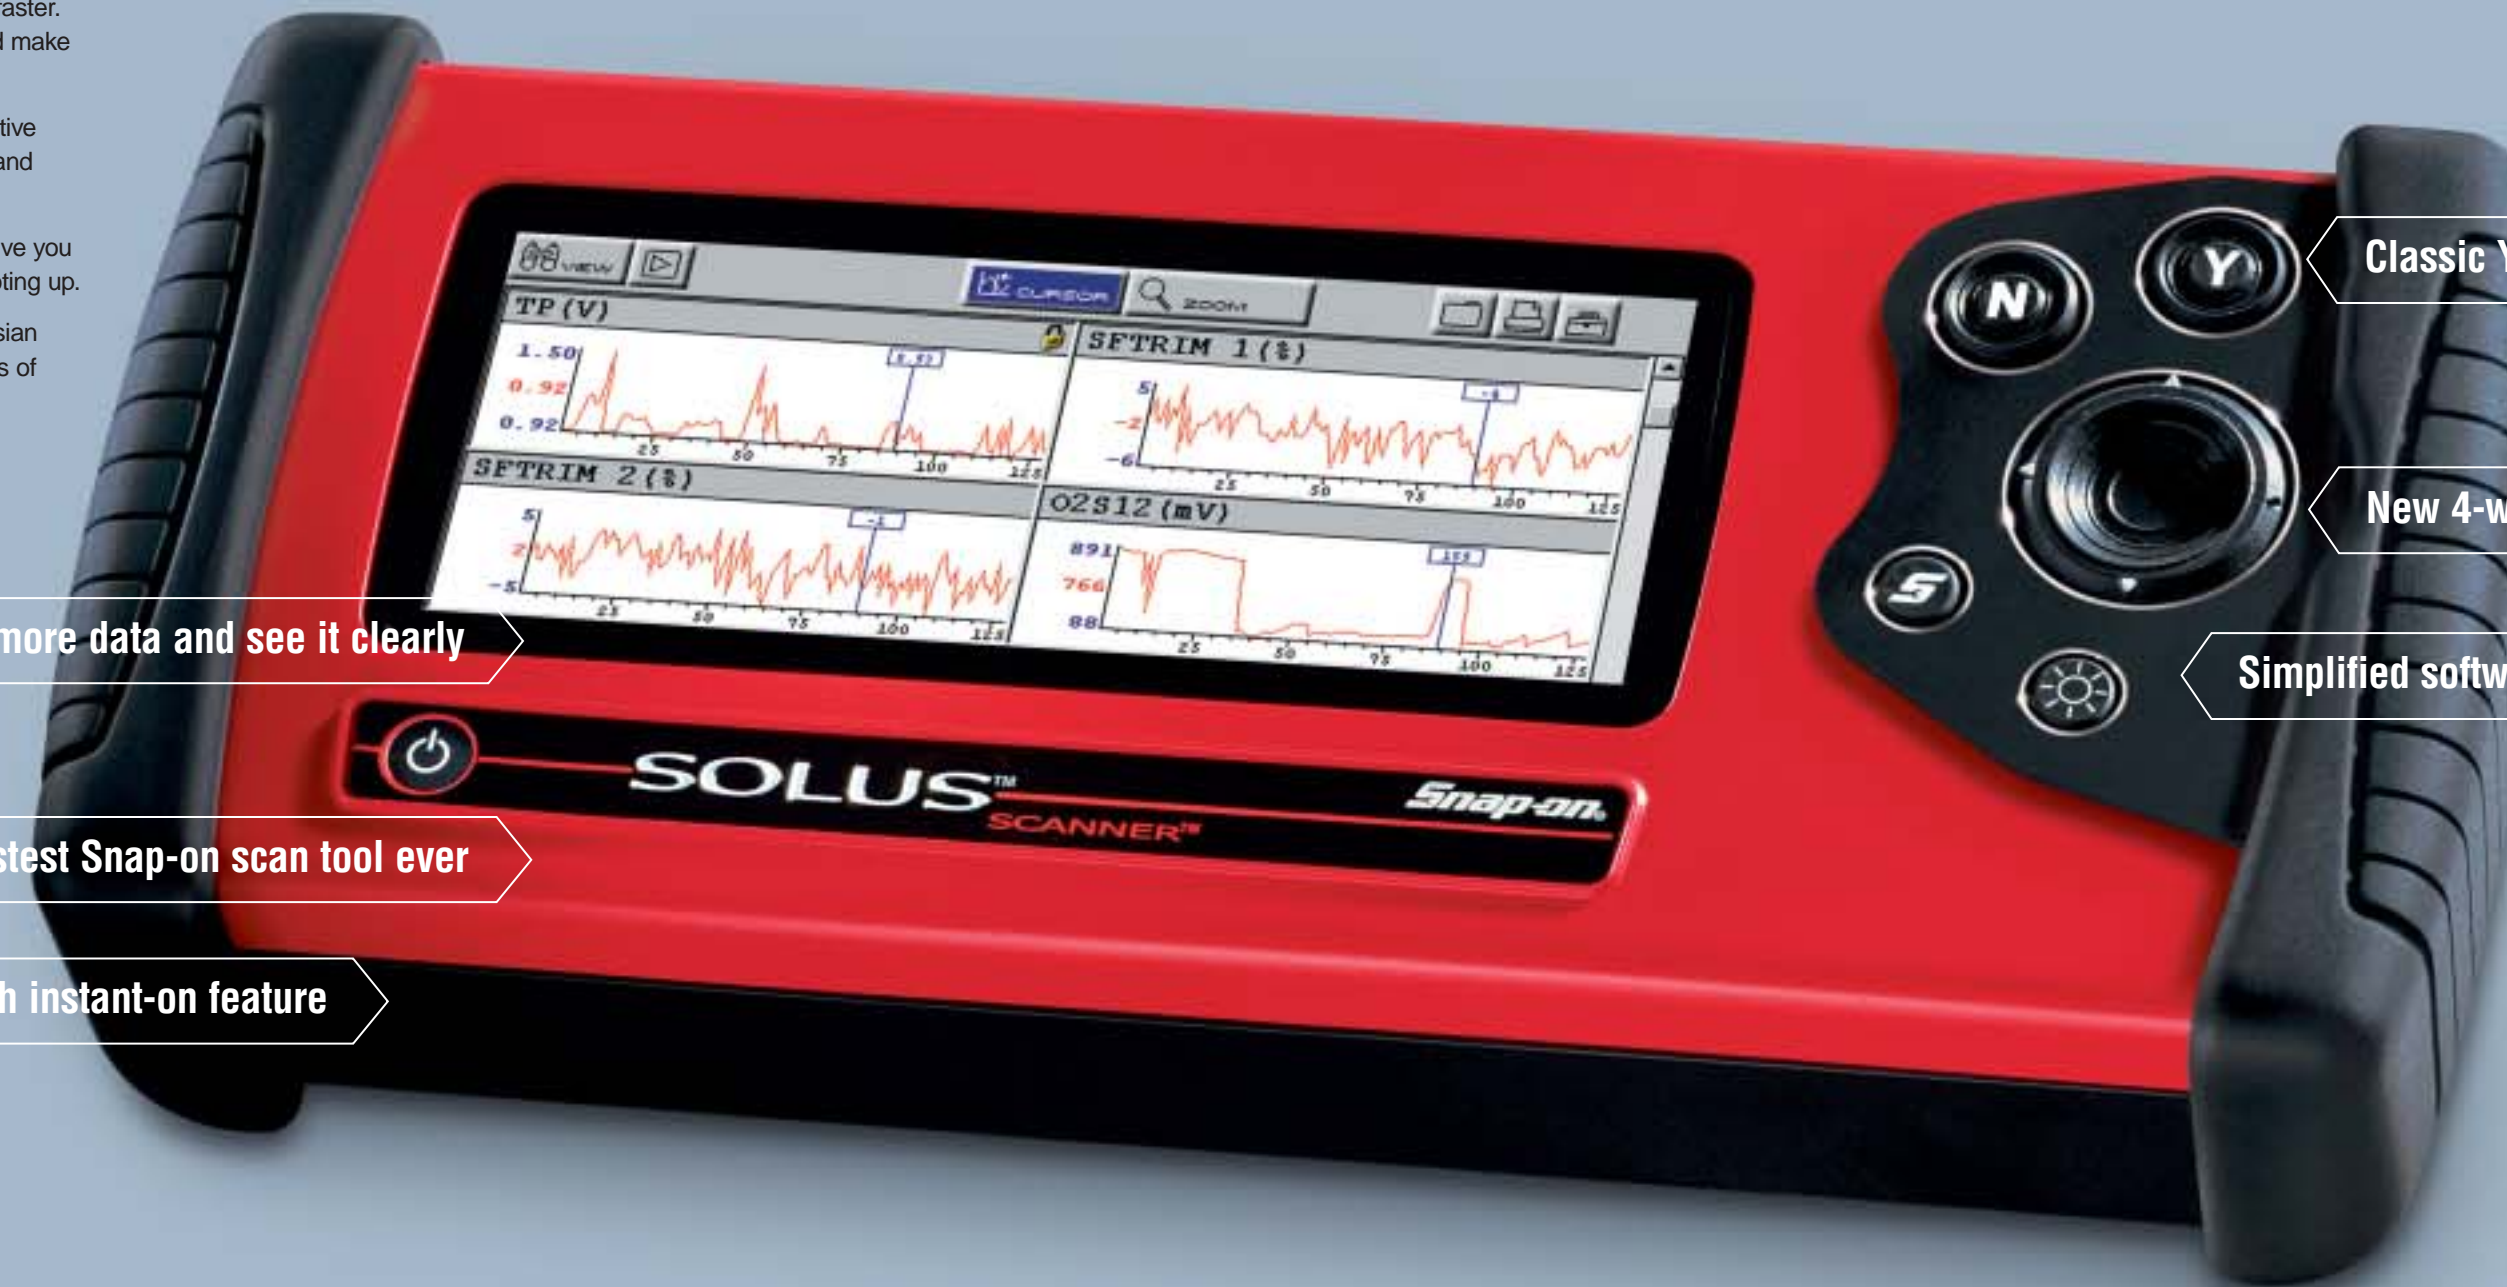

We suppose you'd call that getting the big picture.

Once you see the **BIG PICTURE** inside, you'll realize just how much you get.

>> 6.2" color 1/2 VGA display to see more data and see it clearly

>> ARM processor making this the fastest Snap-on scan tool ever

>> Intelligent power management with instant-on feature

Classic Y and N buttons for intuitive operation <<

New design for improved ergonomics <<

New 4-way control for enhanced navigation <<

Simplified software bundling with most in-demand titles <<

Features that let you find it and fix it...fast.

- > Domestic, Asian and Global OBD Vehicle Communication Software is standard and delivers codes, data, and functional tests for vehicles as far back as 1980.
- > Fast-Track® Troubleshooter software displays real world information with live vehicle readings to help diagnose the hundreds of data parameters and codes on today's vehicles.
- > View 512 frames of data in 1, 2 or 4 graph views.
- > Pause data to review all parameters, turn on cursors for accurate frame of reference to compare values.
- > SOLUS continuously captures data for all parameters in the data list, not just those displayed on the screen.
