Defining Community Engaged Learning
Community Engaged Learning involves working to make a difference in the civic life of our communities through both political and non-political processes while developing the combination of civic knowledge, civic skills, civic values, and civic action to make that difference.

Three Forms of Community Engaged Learning

The Center for Community Engaged Learning (CCEL) facilitates three forms of community engaged learning:
SERVICE

Involves working directly with community residents to meet an immediate need; such as, volunteering to serve meals at a homeless shelter, serving as a mentor or tutor in a local youth development program or school; cleaning up the banks of the Ogden River; hosting a Valentine’s Ball at a local senior center; or coaching a Special Olympics team.
DEMOCRATIC ENGAGEMENT

Involves raising awareness about issues of public concern and working more systemically through both political and non-political processes to create change; such as, attending organized discussions about pollution, serving on a neighborhood association, writing a letter to an elected official, serving as a poll worker, assisting with voter registration drives, engaging others in the process of deliberative democracy, or producing a piece of legislation or policy.
Involves gathering information with and for community organizations to solve a pressing community problem or create change. Examples of community research include, but are not limited to: community needs assessment survey; water quality or scientific assessment; or program evaluation for non-profit organizations.
Community Engaged Learning
Teaches Course Objectives

Because community engaged learning is designed to help you learn and apply course material, your community experience should be relevant to the topics and issues you are studying in your course.
The Benefits of Community Engaged Learning
