Dear iUTAH Participant,

iUTAH is now accepting applications for the 2017 iFellows Summer Undergraduate Research Program.

The iFellows Program provides an opportunity for undergraduate students to gain first-hand research experience in the labs of iUTAH project scientists. iFellows are placed at either the U of U, USU, or BYU for the summer, and participate in valuable research, mentorship, science training and communication opportunities throughout the program.

Program dates: May 15 - July 28, 2017

We are recruiting undergraduate students from any Utah institution of higher learning. Students from institutions that primarily serve undergraduates and students of diverse cultural backgrounds are especially encouraged to apply. The program recruits students to assist with iUTAH-related research, which cover a wide range of academic disciplines. Applicants from any university major who are interested in research and water-related issues in Utah are welcome to apply.

Visit the iUTAH website for:
• The 2017 program application
• Information on the program, which includes a $4,500 stipend
• Recruitment materials (including printable flyers and a brief presentation)

Applications are due on February 10, 2017

Please share this exciting opportunity with students and faculty in your network!

Sincerely,

Your iUTAH Project Office
