

Approach	Question	Info. Needed	Source	Method of Collection	Analysis
Descriptive	Is there a relationship between fluency and reading comprehension? If so, does repeated reading increase the fluency to help boost the reading comprehension?	1. a. Discussions with students about what they are reading. B. Notes on observations about how and what the students are reading.	Small group of students	Observation and listening to students read	Review and write a narrative about how students are able to comprehend and if fluency might be a good indicator of the students overall comprehension.
Correlation	What is the relationship between, fluency, repeated reading, and reading comprehension?	1.a.Base line of students reading comprehension b. Data that represents students beginning fluency for the passage and then data that shows students growth. c. Final test that shows results of reading comprehension after fluency is taught over a period of time.	1 <sup>st</sup> grade students in a classroom	1. a.-c. testing	Observations and a review of the tests that were taken to see if there is any correlation between fluency and comprehension.
Comparative	Can comprehension in reading be increased by fluent repeated reading of words and passages?	1.a.Base line of students reading comprehension b. Data that represents students beginning fluency for the passage and then data that shows students growth. c. Final test that shows results of reading comprehension after fluency is taught over a period of time.	1 <sup>st</sup> grade students in 2 different classrooms.	1. a.-c. testing	Comparative analysis of the students in different classes, baseline, beginning fluency, and final fluency scores.

Quasi	What is the effect of Fluency on Reading Comprehension?	<p>1.a.Base line of students reading comprehension</p> <p>b. Data that represents students beginning fluency for the passage and then data that shows students growth.</p> <p>c. Final test that shows results of reading comprehension after fluency is taught over a period of time.</p>	1 <sup>st</sup> grade students in a classroom	Intact Groups	Analysis of the students in different classes, baseline, beginning fluency, and final fluency scores.
True	What is the effect of Fluency on Reading Comprehension?	<p>1.a.Base line of students reading comprehension</p> <p>b. Data that represents students beginning fluency for the passage and then data that shows students growth.</p> <p>c. Final test that shows results of reading comprehension after fluency is taught over a period of time.</p>	1 <sup>st</sup> grade students in a classroom	Randomly assigned groups	Analysis of the students in different classes, baseline, beginning fluency, and final fluency scores.
