

Pre-Dental Recommended Schedule

Listed are only General Education and Pre-Dental required and recommended courses. Courses in **bold** are common dental school pre-requisites. Schedule DOES NOT include courses needed to complete a bachelor's program. Students must seek academic advisement for specific courses to complete Program of Study (major/minor) requirements.

Bachelor's Degree Required for Dental School Admissions

Microbiology, Zoology, and the Bachelors of Integrated Studies are the three most common bachelor degree programs pre-dental students choose. Total credit hours required for a BS/BIS are 120; upper division credit hours required for a BS/BIS degree is 40. Chemistry courses required and listed in the above suggested schedule complete a Chemistry minor. Many students take courses during the summer term or take an additional semester or two to complete BS degree requirements for a more competitive dental school application. Note that although most students complete or are close to completing a degree, it is NOT required by dental schools.

General Education

The schedule above suggests pre-dental recommended courses that fulfill general education requirements including: PSY SS1010, COMM HU2110, ECON SS1010, CHEM PS1210, PHYS PS2010 and MICR LS2054. Care should be taken in choosing the remaining general education breadth courses due to the University Diversity requirement that can be fulfilled by specific general education courses. If properly chosen, one course can complete two requirements. Otherwise, a separate course (not listed here) will need to be completed for Diversity. Refer to [GENERAL EDUCATION](#) requirements for more details. (Note: Do no duplicate departments when fulfilling General Education Breadth areas.)
