CLASS Psy 3140	Department/Program Learning Outcomes			
	Knowledge	Application	Values/ Ethics	Interpersonal Relations and Communication
Rating	4	3	2	2
Justification	The emphasis of the course is on the scientific study of adolescent development. This knowledge is presented largely through lecture and assessed through papers, posters, MC/Essay exams, and discussions.	Although there are limited opportunities for application, lectures and discussion focus of how the course content applies to students' own adolescence and the adolescents in student's lives.	Ethics in research is presented in lecture format and discussed. The value of the scientific approach of understanding of adolescence is emphasized	Papers, small group work and group presentations afford opportunities for practice in the collaboration and the professional communication of the material.

Note: The values in the cells reflect the relative emphasis in the course of each learning outcome from a scale of 1 (low) to 4 (high). The value indexes the amount of lecture material devoted to each goal, the number of assessments dedicated to each goal, and the weighting or importance of assessments of each outcome for the final grade in the course.
