TBE (NTM) – Telecom – Dean Response

From Committee and Response:
- The faculty are mostly adjuncts. This assures that the knowledge base is up-to-date. However, it also makes organization of the program dependent on, essentially, one person. The Dean concurs but also wonders about creating stronger bond with CS.
- Department advisor. This is same as above. Interesting that students believe that advisement is good.

- Increase funding sources. Dean agrees this is problem going forward and all options should be examined. Interesting that committee, students, believe equipment is good.

- Search for more lab aides. Again, this might benefit from working with CS.

- Discuss a master's degree. Dean believes that this is an interesting approach but would like to see much more justification and planning for resources.

- Assessments through certification exams. Dean would like to examine this.
