

Drop-In Online Math Tutoring

How to use Discord for online math tutoring

When you click the link on the tutoring website it will send you here.

Create your own username and hit continue.

Or, if you already have a Discord account, click the link "Already have an account?"

The screenshot shows the Discord interface for joining a server. At the top left is the Discord logo. The background is a dark, starry space. In the center is a dark gray panel with a white circular profile picture of a green stick figure. Below the profile picture, it says "Radec invited you to join". Underneath that is the server name "Weber State Tutoring Center" with a small "WSTC" icon to the left. Below the server name are two buttons: "8 Online" and "19 Members". Below these is a "USERNAME" section with a text input field containing the placeholder text "What should everyone call you?". Below the input field is a blue "Continue" button. At the bottom of the panel is a link that says "Already have an account?". At the very bottom, in small text, it says "By registering, you agree to Discord's Terms of Service and Privacy Policy."

If you're creating a new account, you'll be asked to enter your email address and create a password.

Once you've provided your email and password, click "Claim Account."

This is an unclaimed account. Claim it before it's lost. [Claim Account](#)

Welcome to math drop-in tutoring!

When your tutor is ready, please join the Math Waiting Room voice chat by clicking on the speaker icon next to "Math Waiting Room" on the left side of your screen.

Then, send a message in this chat with the course number of the class you're looking for help in as well as any other relevant information you would like your tutor to know before they see you.

When your tutor is ready, you will automatically be moved into a private voice chat with them. Please be ready with your W number before meeting with your tutor.

Claim your account to keep all your servers and chats even after you close the browser.

Upon first entering, you will be sent here – to the #mathque.

To get started with tutoring, you need to follow two steps.

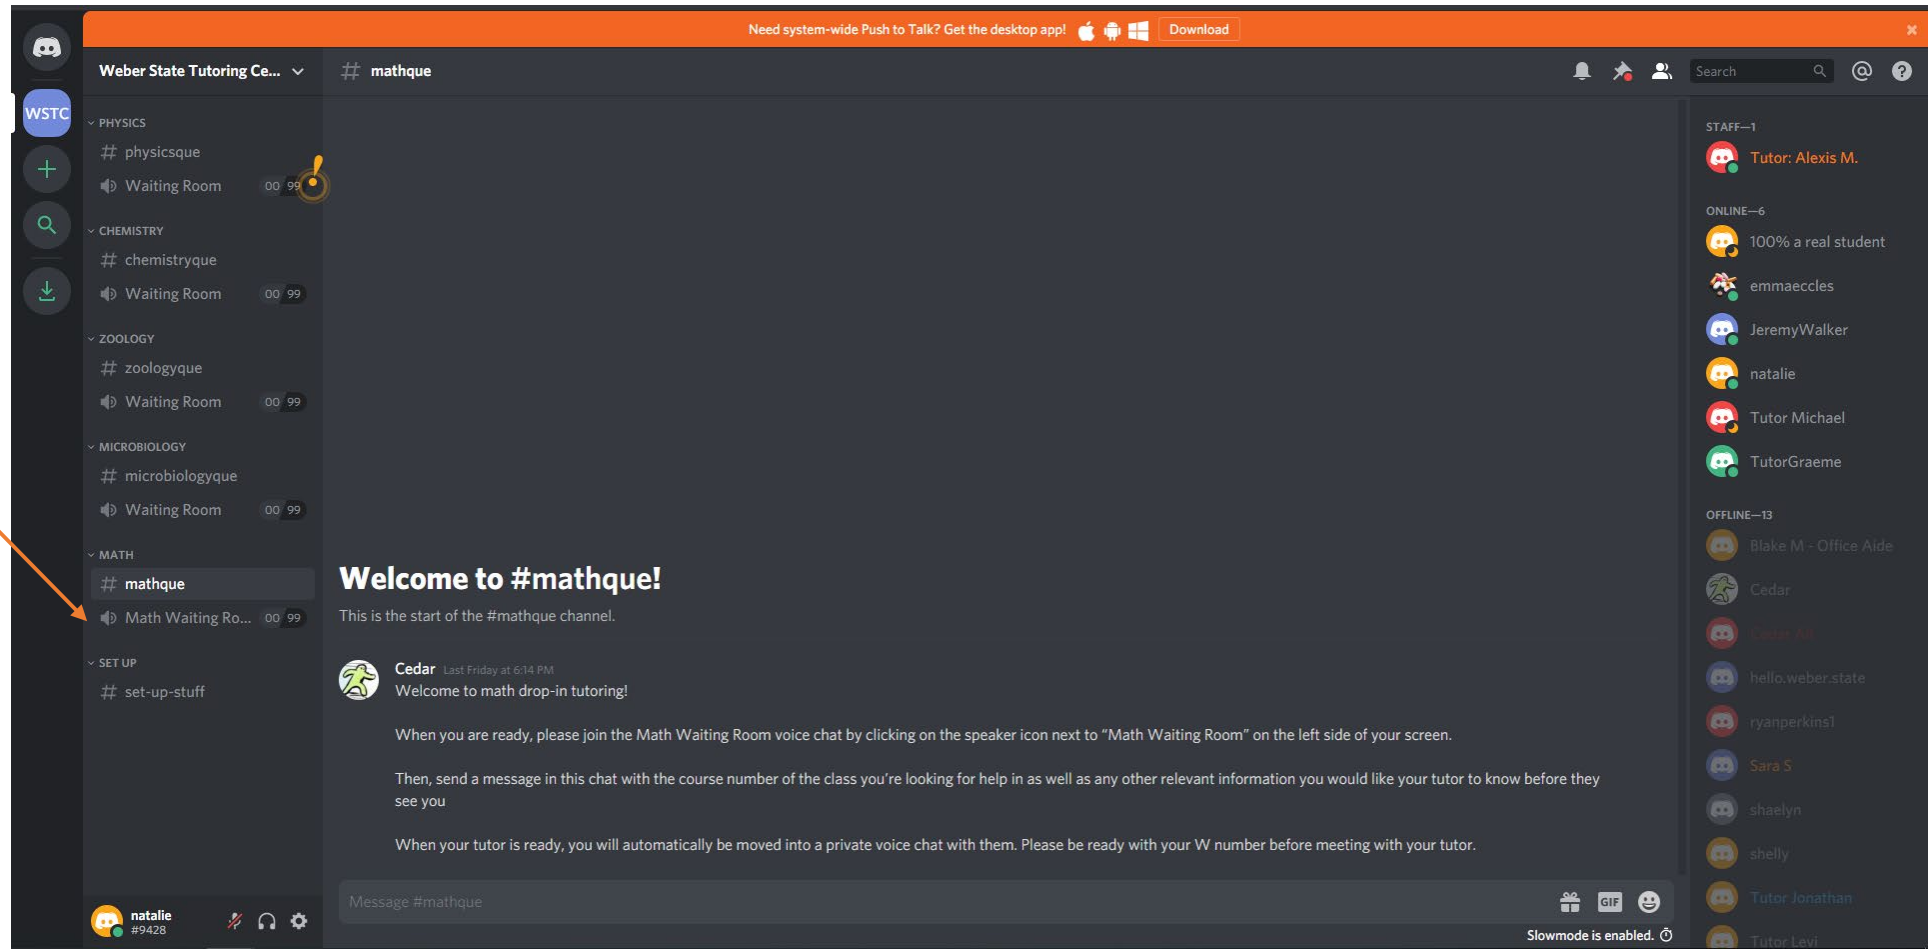

See next page for details.

Step 1:

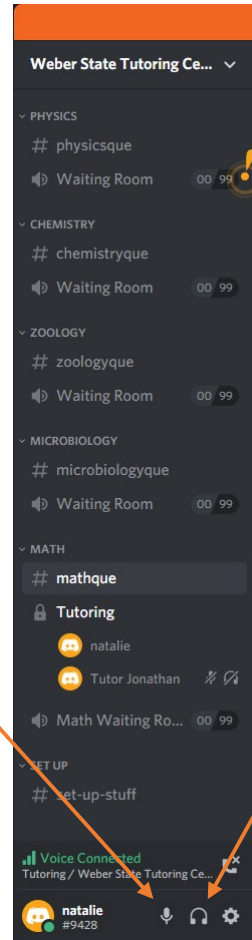

Click the speaker icon next to the “Math Waiting Room.”

This will enter you into a live audio chat with other students waiting for tutoring.

Step 1a:

If, at any time,
you need to
mute your
microphone,
click on the
microphone
here:

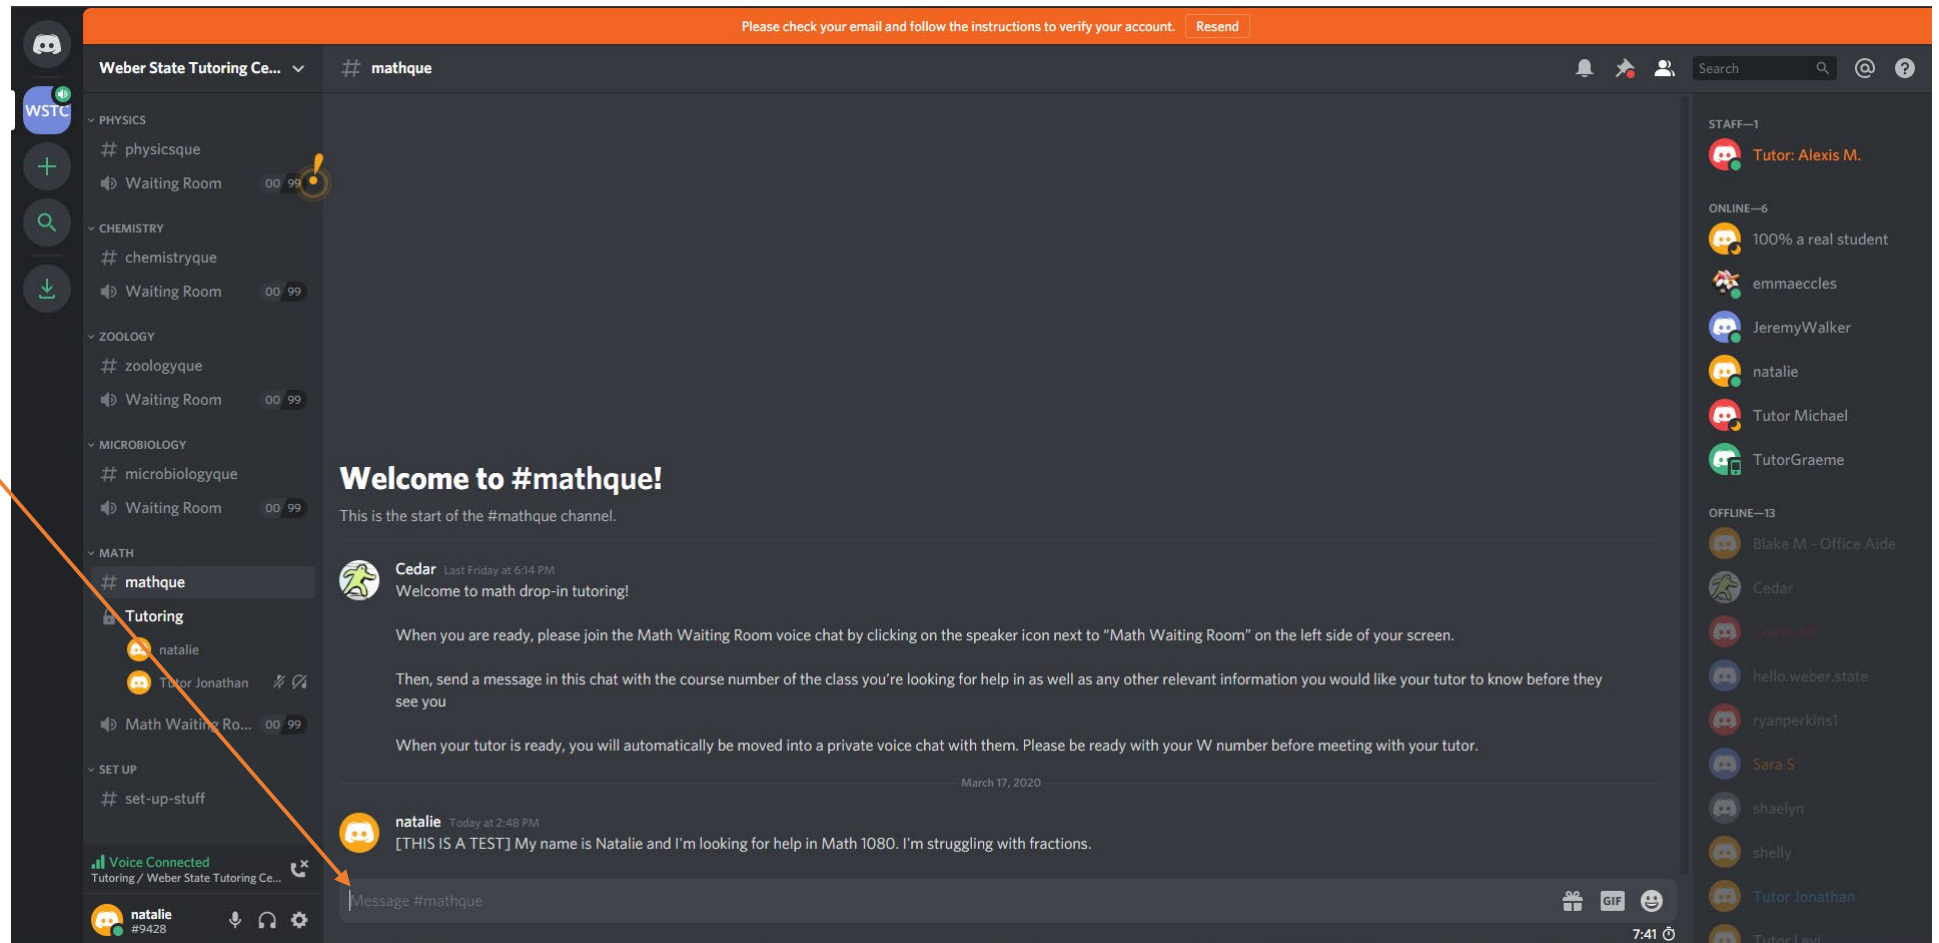

If, at any time,
you need to
mute the audio
chat, click here:

Step 2:

In the main #mathque chat area, please type a message with the following information:

- Your course number (ex: Math 1050)
- And if you would like the tutor to set up a text chat, audio chat, or video chat.

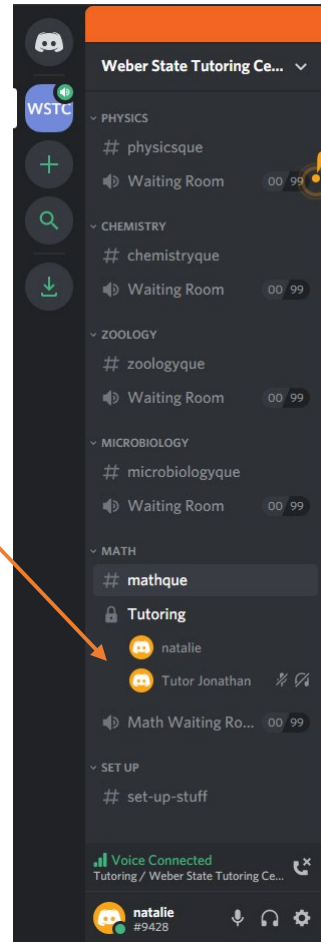

This is how you get in line for a tutor.

You will only be able to send one message every 10 minutes to avoid spamming.

When the next tutor is available, they will start the chat based on your earlier request (text, audio, video).

If you have requested an audio chat, the tutor will move you to a private chat space.

If you have requested a text chat or video chat, you'll receive that request as a direct message.

You can access this direct message by clicking on the icon in the left menu bar.
