Program Information (Continued)

- Securing an NP clinical site placement is a collaborative process. Success occurs due to a partnership between the student, the Graduate Programs Clinical Coordinator, and faculty. The Graduate Clinical Coordinator will work collaboratively with you to identify clinical sites where you would like to be placed. The Graduate Clinical Coordinator will work to manage placements and ensure documentation is correct. In doing so, they will consider the program outcomes, course outcomes, and your overall performance in coursework and in previous clinical experiences. Under some circumstances, you may be directed to complete a clinical experience at a specific site or within a specific time frame based on assessing your progress or the availability of clinical sites during the semester.
- Plan on 2 to 3 days/week of clinical activity for semesters 4, 5, 6, 7 & 8 in addition to class commitments and labs.
- DNP Project requirement: begins semester 3 and continues through semester 5 - for prior projects, see: [Nursing Grad Projects](http://weber.edu/Nursing/GradProjects.html) (weber.edu/Nursing/GradProjects.html)
