

WSU Ramps Up Mobile Effort

As the demand for mobile technology increases, Weber State University is making a concerted effort to meet the mobile needs of those on campus — whether on an iPhone, Android or tablet.

“Going forward we are thinking mobile first in all of our new development,” said WSU Web services manager Peter Waite. “The first question we ask is, ‘Does it make sense for mobile?’ If so, then we start there first. If it doesn’t, then we look to the desktop or other platforms.”

WSU’s mobile efforts have become a campus-wide initiative. Campus educators, staff and students are coming together for conversations about the place of mobile technology in the classroom, innovative teaching methods utilizing mobile technology and a campus-wide plan for mobile tech support.

WSU’s mobile website (m.weber.edu), which officially launched in November, provides links to many areas of the traditional WSU website that mobile users are most likely to be looking for — such as university email, campus maps and the university calendar.

WSU students and staff have also developed a mobile application suite. The WSU Testing Center, WSU Computer Labs, Campus Stores, KWCR 88.1 Weber FM and the Student Recruitment Office all have apps. A number of other apps are under development and should be released soon.

More users in more places on campus increase the need for enhanced network infrastructure so that users’ mobile devices have strong enough connectivity. WSU is preparing to dramatically increase the number of internet access points on campus to try to address that need.

“This effort is based on the need to communicate with students in the way that makes sense for them,” said Bret Ellis, Vice President of Information Technology. “Mobile technology will create engaging learning opportunities, allow new and innovative interactions with faculty, keep students informed about their education and provide community members access to the campus.”

Visit weber.edu/mobile for more information about WSU’s mobile effort.

Purchasing Tips for Group Travel

Any employee, who travels with and is accountable for the travel of a group, has several important responsibilities for financial record keeping:

★ Before trip:

Complete Part I of the WSU Travel Log and obtain required approval. Make necessary travel reservations well in advance for transportation, lodging, etc.

★ During trip:

Maintain all travel-related receipts. Use the Group Cash Disbursement Record to document cash given to individual group travelers in lieu of per diem.

★ After trip:

Within 10 business days, complete the WSU Travel Log, reconcile expenses, sign and obtain supervisor approval and take the log to the Cashier's Office for processing.

If you have questions, contact the new group travel manager in Purchasing and Support Services, **Paul Oldham**. With more than 15 years of travel-industry experience, he can help secure the best accommodations for the best price on flights, hotels and ground transportation. You can reach him by email at pauloldham@weber.edu or by calling 801-626-7024.

FACULTY AND STAFF ACCOMPLISHMENTS

Jonathan Clark, zoology professor, presented a paper at the Sixth International Symposium on Molecular Insect Science in Amsterdam, The Netherlands, titled “Comparative Genetic Analysis of the Telomere-Associated Transposable Element, HeT-A, in *Drosophila*.” The coauthor was zoology student Haylie Cox.

Azenett Garza, associate psychology professor, coauthored an article in the *European Journal of Social Psychology* titled “Group Commitment in the Face of Pervasive Discrimination: The Role of Legitimacy Appraisals.”

Leah Murray, associate political science professor, coauthored a chapter titled “2010 U.S. Senate Elections: Stuck in the Middle to Lose” in the book *Tea for Only Two: The Ousting of Utah Senator Robert Bennett*. The book was published by Lexington Books and analyzes the Tea Party’s impact on the 2010 campaigns for the United States Senate.

Bradford Reynolds, assistant criminal justice professor, coauthored an article titled “Being Pursued Online: Applying Cyberlifestyle-Routine Activities Theory to Cyberstalking Victimization” in the journal *Criminal Justice and Behavior*.

Get Ready *NCUR date inches closer*

For most of the world, the big countdown to midnight happens only once a year, but for Weber State University’s John Cavitt it happened twice in 45 days – once on New Year’s Eve, of course, and once on Nov. 15, when he stayed up to watch the last of the submissions roll in for the 2012 National Conference on Undergraduate Research (NCUR).

As WSU’s director of undergraduate research and chair of the 2012 NCUR steering committee, Cavitt was pleased to see the official total – 3,196. Weber State faculty have since reviewed the abstracts and accepted 2,767 for presentation at NCUR, which WSU is hosting March 29-31.

The foremost undergraduate research conference in the country, NCUR will bring together students from 46 states, Washington, D.C., Guam, Puerto Rico, the United Kingdom and the United Arab Emirates to present their research and scholarly and creative works. From Utah students, Weber State had the highest number of abstracts accepted with 165.

“We’ve been planning this conference since 2009, but now that the abstracts have been submitted and reviewed, that makes it a reality for us,” Cavitt said. “We’ll soon have 3,000+ undergraduate researchers at Weber State, sharing their projects and spreading excitement about research on campus.”

(continued on page 2)

Help Wanted Volunteers are needed to:

- Moderate oral sessions;
- Assist with registration desk;
- Fill conference bags;
- Help with technology set-up/issues;
- Greet guests;
- Help with audio/visual equipment;
- And more.

New Calendar Connects Campus

Two years after implementing a sophisticated scheduling system, the university this month launched a companion master-calendar system online that will make events both easier to find and to promote.

Beginning in January, whenever an organization or individual schedules an event location on campus, the event, if approved, automatically can appear on the Master Calendar.

Organizers who want to enhance their listings then will have the opportunity to add details such as contact or ticketing information, photos or links.

“This will be a robust event calendar that will allow planners to bump up their marketing by providing enhanced information about anything they sponsor, in a place that’s easy to find,” said Chad Mosher, the Event Management Systems (EMS) project manager.

Users can choose to see every event on campus or refine their selection to any one of 10 individual calendars, including athletics, performances or speakers. Users also can subscribe to specific calendars so that when an event is added, the subscriber receives an e-mail notification.

“EMS will make it easier for anyone who staffs an information desk to look at the campus-wide calendar and provide better customer service with event details,” Mosher said.

The WSU Calendar can be found at weber.edu and on the personal portal page by clicking on the calendar icon.

The Bulletin Board will be renamed “Announcements” and will be used exclusively for any announcement not associated with an event.

Attending

The three-day event will feature poster and oral sessions on a variety of topics, from biology to literature, to engineering and sport management, as well as performing arts presentations. A plenary speaker will also kick-off each day of the conference. The plenary speakers are:

- **Mario R. Capecchi**, molecular geneticist and winner of the 2007 Nobel Prize in Physiology or Medicine
- **Paul Alan Cox**, director of the Institute of EthnoMedicine in Jackson Hole, Wyo., a *Time* magazine Hero of Medicine, and recent recipient of an honorary Doctor of Humanities degree from WSU
- **Anne Fadiman**, award-winning author of *The Spirit Catches You and You Fall Down*, the true story of a Laotian refugee family’s interactions with the California health-care system

The conference will also feature a graduate school fair and off-campus excursions to Antelope Island, Snowbasin

and Salt Lake City. Faculty, staff and students are welcome to attend presentations, hear guest speakers and visit the graduate school fair without registering for the conference. However, registration is required to participate in NCUR meals and excursions. WSU students who are presenting at the conference will not have to pay registration for any event.

Early registration continues through Feb. 3; late registration begins Feb. 4 and ends Feb. 27.

Because of the wide variety of topics being presented, many WSU professors have chosen to incorporate NCUR into their spring syllabi. Rather than having students attend their regularly scheduled classes those days, some faculty members are requiring students to attend conference sessions within their disciplines.

Volunteering

Faculty, staff and student volunteers are needed to help with the conference. In appreciation, those who sign up and complete eight hours of service will get a T-shirt and flash drive.

To volunteer, or for more information about NCUR, visit weber.edu/ncur2012.

CAMPUS NEWS BRIEFS

Ethics Bowl Champs

A Weber State University Intercollegiate Ethics Bowl team once again qualified for the national finals.

WSU beat nine teams from seven schools to win the 11th annual Wasatch Regional Ethics Bowl Competition, which WSU hosted.

The win advanced the five-member team to the national championship set for March 1 in Cincinnati.

The regional victory was decisive; WSU won all five of its rounds.

“It was a solid performance by every member of the team that contributed to our going undefeated,” said Richard Greene, a philosophy professor who serves as the team’s faculty sponsor and head coach.

With the first-place finish, WSU has won the regional competition three times, and this is the fifth

time in the past six years that WSU teams have advanced to the 32-team nationals.

Teen Behavior Unraveled

Parents do not just have to throw up their hands when it comes to a teenager’s penchant for risky behavior.

Recent research by Leigh Shaw, associate psychology professor, and Eric Amsel, psychology professor and chair

of the Department of Psychology, indicates that adolescents can anticipate the ramifications and regret they will face if they undertake risky activity.

Parents, leaders, coaches and counselors can help teens avoid reckless choices.

The key, according to Amsel, is that adolescents need to be able to apply their thoughtfulness about risk-taking “in the moment.”

“If someone whispers in their ear, ‘Let’s go 90 mph down Harrison Boulevard,’ they may not be able to generate a reason why that’s bad. But they could, and that’s the point,” Amsel said. “They need practice. It’s a very hard skill to acquire.”

Shaw and Amsel’s research was recently published in the *Journal of Research on Adolescence*.

Art Auction for Rhinos

As part of a civic-engagement assignment, students in zoology professor Sam Zeveloff’s mammalogy class raised money and awareness for rhinoceros conservation worldwide.

The students organized a rhino art auction that took place in the Shepherd Union Art Gallery in November.

The auction included work from WSU students and other local artists, including Farr West Elementary School students who created a wall of rhino illustrations.

The auction raised \$720 for the International Rhino Foundation. Zeveloff said he was proud of his students who worked so hard on behalf of a deeply imperiled species.

Hundreds of the animals are killed each year for their horns, mistakenly believed to have medicinal value.
