

JOIN US FOR THE WSU HIGH SCHOOL TEACHERS SUMMER CONFERENCE

MONDAY,
JUNE 10th

8:00 a.m. -
4:00 p.m.

WSU is excited to introduce a transformative **Series-Parallel Circuit Training System**, designed to make learning about electrical circuits **FUN** and **HANDS-ON**. This innovative tool features magnetic components, which simplify building and understanding series and parallel circuits. Perfect for both instruction and real-world troubleshooting exercises. We've integrated elements of gamification, turning electrical diagnosis into a challenge that sparks students' curiosity and competitiveness. You'll get a hands-on experience with the system at the conference, allowing you to take your setup home and use this dynamic approach to learning directly into your classroom.
