

## Using the Canvas Conferences tool

All face-to-face courses have a corresponding Canvas course so you can display an in-class lecture through a webinar-interface called Canvas Conferences quickly.

### Required technology:

- A laptop with a camera that can connect to your teaching station
- Some kind of lightweight microphone (Bluetooth enabled if possible such as Air Pods)
- You can use your laptop microphone but the sound isn't always clear
- The Conferences tool in Canvas can display your screen or a PowerPoint presentation

### Quick-start Guides on using Canvas Conferences:

- [How do I create a conference in Canvas](#)
- [How do I use the Conferences interface as a presenter in Canvas](#)
- You can record your lecture and students can watch it for up to 14 days after recording

Please contact us at WSU Online Canvas Support if you have any questions about using Conferences in Canvas.
