Weber State University Phased Guidelines for Pandemic Recovery

The goal of the Weber State University COVID-19 Task Force (Task Force) and Office of Emergency Management is to return the university to regular operations in an efficient, effective, but overall, safe manner. Following the presumed guidance of federal, state and local public health officials, WSU plans to use a cautious phased approach in returning to normal day-to-day activities to avoid a resurgence of disease that could compromise fall semester 2020. The purpose of the phased approach is to allow the recovery to proceed in such a way that it is easy to return to pandemic response functions should there be a resurgence of the virus. A slower, incremental return to regular operations will allow public health officials to monitor the effects of the societal changes to the spread of the virus. Should infection or transfer rates begin to increase, with this phased approach, WSU could take a small step back rather than completely change the university’s entire operational course again.

DISCLAIMER: These are recommendations that are subject to modification and may be superseded by county or local health department guidance.

CDC, the Utah Dept. of Health, and local health depts.

- Symptom checking in public and business interactions and pre-packaged options
- Restaurants and dining facilities are open for takeaway
- Employers evaluate workforce strategy, concerns, and enact strategies to minimize economic impact
- Employees operate remotely, unless not possible
- Classes online only
- Sick members of the same residence should have their own room if possible and keep the door closed
- Regularly disinfect high-touch areas (e.g. door handles, buttons/switches, handrails, shopping carts, check-out counters, restroom surfaces)
- Resume normal travel

WSU executives and individuals take extreme precautions

- All services operating
- Schools are open
- Regularly disinfect high-touch areas (e.g. doorknobs, buttons/switches, handrails, shopping carts, check-out counters, restroom surfaces)
- Resume normal travel

| - Design spaces to maintain 6-foot distance between individuals  
- No university related travel. | - Symptom checking in public and business interactions (checklist or verbal symptom checking)  
- Design spaces to maintain 6-foot distance between individuals  
- University related travel (domestic/international) should not occur during the moderate risk stage. | - Non-essential university related travel should be limited.  
- Exceptions to this restriction should be approved by the department chair, Dean or Vice President with the approval of the COVID-19 Task Force Executive Committee.  
  - Travel reservations should not be made without refund ability.  
  - An abundance of caution should be used if traveling during this time.  
  - Any traveler returning from a high-risk area may be subject to a 14-day isolation period. | - |
## Tiered Guidelines for High-Risk Individuals

High-risk individuals are defined as people 65 years and older, people who live in a nursing home or long-term care facility, people of all ages with underlying medical conditions, including lung disease or moderate to severe asthma, people who have serious heart conditions, people who are immunocompromised (many conditions can cause a person to be immunocompromised, including cancer treatment, smoking, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications), people with severe obesity, diabetes, chronic kidney disease undergoing dialysis, or liver disease.

### Weber State University

**Phased Guidelines for Pandemic Recovery**

<table>
<thead>
<tr>
<th>Risk Level</th>
<th>Guidelines</th>
</tr>
</thead>
</table>
  - Follow all General Guidelines outlined on page 6  
  - Takeout only. This includes pre-packaged food, delivery, curbside pickup, third-party delivery (e.g., DoorDash, Grubhub, Uber Eats)  
  - Check symptoms of employees  
  - Stagger workstations so workers can maintain a 6-foot distance and do not face one another  
  - Encourage contactless payment; if not possible, disinfect transaction terminal between customers  
  - Staff must sanitize hands between handling payment options and food/containers  
  - Employers provide personal protection equipment such as face coverings, hair nets, gloves, overalls  
  - Customers voluntarily provide contact information to assist with contact tracing efforts |
| Moderate Risk | - Takeout, curbside pickup, or delivery options encouraged. Dine-in services allowable with extreme precaution, following strict guidelines around physical distancing and staff monitoring. Contactless payment encouraged. Create safe environment for staff.  
  - Follow all General Guidelines outlined on page 6  
  - For dine-in services:  
    - Dine-in services, including buffets, may be open under the following requirements outlined in the appendix on page 19  
    - For takeout services:  
      - Check symptoms of employees  
      - Face coverings are worn by staff, stagger workstations so workers can maintain a 6-foot distance and do not face one another  
      - Encourage contactless payment; if not possible, disinfect transaction terminal between customers  
      - Staff must sanitize hands between handling payment options and food/containers  
      - WSU provides personal protection equipment for employees, such as face coverings, hair nets, gloves, overalls  
      - Customers voluntarily provide contact information to assist with contact tracing efforts |
| Low Risk  | - Dine-in service are opened, with tables arranged so there is appropriate distance between diners.  
  - Increased hygiene practices for customers and staff.  
  - Follow all General Guidelines outlined on page 6  
  - Dine-in services, including buffets, may be open under the following requirements outlined in the appendix on page 19  
  - For takeout services:  
    - Check symptoms of employees

    - WSU provides personal protection equipment for employees, such as face coverings, hair nets, gloves, overalls  
    - Customers voluntarily provide contact information to assist with contact tracing efforts |
| New Normal Risk | - Dine-in restaurants operating under proper safety precautions for staff and customers. |

#### Weber Dining (cafe, cafeteria dining, cafes, residential kitchens, food service, break rooms, catering)

- Essential retail (e.g., grocery) create a safe environment for customers and staff with frequent reminders on distancing and hygiene. Monitor patrons and employees for symptoms. Customers and employees wear face coverings.  
  - Follow all General Guidelines outlined on page 6  
  - Both customers and employees wear face coverings  
  - Maintain signage to remind and help individuals stand at least 6 feet apart, including outside when in line, and in store check-out lines  
  - Assign an employee to disinfect carts and baskets after each use  
  - Maximum number of patrons must be such that a 6-foot distance between patrons and employees can be maintained.

- Retail establishments create a safe environment for customers and staff with frequent reminders on distancing and hygiene. Monitor employees for symptoms. Customers and employees wear face coverings.  
  - Follow all General Guidelines outlined on page 6  
  - Both customers and employees wear face coverings  
  - Maintain signage to remind and help individuals stand at least 6 feet apart, including outside when in line, and in store check-out lines  
  - Assign an employee to disinfect carts and baskets after each use  
  - Maximum number of patrons must be such that a 6-foot distance between patrons and employees can be maintained.

- Retail establishments exercise discernment, establishing principles for safe environment and public trust. Monitor employees for symptoms and encourage face coverings for any interactions taking place within 6 feet.  
  - Follow all General Guidelines outlined on page 6  
  - Face coverings are worn for interactions that take place within a 6-foot distance  
  - Maintain signage to remind and help individuals stand at least 6 feet apart, including in store checkout lines  
  - Assign an employee to disinfect carts and baskets regularly  
  - Resume to normal patron capacity if social distancing guidelines can be maintained.

---

3 Dine-in services not recommended during moderate risk conditions. However, if dine-in services are opened, the following precautions should be taken.

4 Face coverings are extremely important in the retail setting, as customers are passing one another with high frequency.

**Libraries** (small workrooms, study carrels, open seating, collaborative/communal workspaces, technology rentals, IT assistance)

- In-person operation of libraries is discouraged, but allowable under increased cleaning regimen and operational protocols in place to ensure safe distancing restrictions are met.
  - Follow all General Guidelines outlined on page 6
  - Set an established window of time for high-risk groups to come in and/or separate entrances and queues
  - Limit the number of people in a confined area to enable adequate distancing at all times
  - Maintain signage to remind and help individuals stand at least 6 feet apart when in common areas
  - Maintain signage to remind and help individuals stand at least 6 feet apart when in common areas
  - Congregating at any point is not allowed
  - Encourage contactless transactions
  - Assign an employee to disinfect high-touch objects after each use

- In-person operation of libraries is allowable under increased cleaning regimen and operational protocols in place to ensure safe distancing restrictions are met.
  - Follow all General Guidelines outlined on page 6
  - Set an established window of time for high-risk groups to come in and/or separate entrances and queues
  - Limit the number of people in a confined area to enable adequate distancing at all times
  - Maintain signage to remind and help individuals stand at least 6 feet apart when in common areas

- In-person operation of libraries is allowable under increased cleaning regimen and operational protocols in place to ensure safe distancing restrictions are met.
  - Follow all General Guidelines outlined on page 6
  - Provide an established window of time for high-risk groups to come in and/or separate entrances and queues
  - Limit the number of people in a confined area to enable adequate distancing at all times
  - Maintain signage to remind and help individuals stand at least 6 feet apart when in common areas
  - Assign an employee to frequently disinfect high touch areas/objects
  - Provide hand sanitizer at checkout counters and entrance/exit

- In-person operation of libraries is allowable for large groups.
Weber State University
Phased Guidelines for Pandemic Recovery

### High Risk

- Assign an employee to disinfect high-touch objects after each use
- Provide hand sanitizer at checkout counters and entrances/exits
- Consider one-way aisles to support physical distancing
- Consider installing a clear plastic partition between staff and patrons where it is not possible to maintain 6 feet of distance
- Make regular announcements to remind patrons to follow physical distancing guidelines

### Moderate Risk

- Provide hand sanitizer at checkout counters and entrances/exits
- Consider one-way aisles to support physical distancing
- Consider installing a clear plastic partition between staff and patrons where it is not possible to maintain 6 feet of distance
- Make regular announcements to remind patrons to follow physical distancing guidelines

### Low Risk

- Consider installing a clear plastic partition between staff and patrons where it is not possible to maintain 6 feet of distance

### New Normal Risk

- Phased Guidelines for Pandemic Recovery

---

**Events, Cultural Arts & Entertainment (including concerts, sporting events, theatres, museums, on campus socials)**

- In-person operation of these settings is allowable under increased cleaning regimen and operational protocols in place to ensure safe distancing restrictions are met.
- Follow all General Guidelines outlined on page 6
- Spectators encouraged to attend remotely
- A 10-foot distance must be maintained between individual household groups at all times while seated
- For reserved-seating facilities, facility capacity is dependent on ability to block reserved seats (demonstrated on digital seat map) to ensure safe radius
- Set an established window time for high-risk groups to come in without pressure from crowds and/or separate entrances and queues
- Limit the number of people in a confined area to enable adequate distancing at all times
- Maintain signage to remind and help individuals stand at least 6 feet apart when in common areas or while visiting exhibits
- Congregating at any point is not allowed
- Encourage contactless payment; disinfect between transactions and comply with other retail recommendations
- Participants (e.g., players, performers, actors) in events should have their symptoms checked
- Electronic tickets and playbills encouraged in place of paper

---

**Concessions:**

- Serving and seating protocols consistent with restaurant guidance
- Maintain 6-foot distancing for all lines
- Encourage contactless payment
- To the extent reasonable, serve grab-and-go food items
- Any concessions/restaurant seating is compliant with restaurant dine-in recommendations

---

**Concessions:**

- Serving and seating protocols consistent with restaurant guidance
- Maintain 6-foot distancing for all lines

---

*Note: All guidelines are subject to change and should be followed accordingly.*

<tr>
<th>Gyms &amp; Fitness Centers (including indoor recreation centers, intramural sports, weight rooms, yoga studios, dance, etc.)</th>
<th>High Risk</th>
<th>Moderate Risk</th>
<th>Low Risk</th>
<th>New Normal Risk</th>
</tr>
</thead>
</table>
| Fitness centers and gyms are closed. | Recommended closure of fitness centers and gyms; if open, fitness centers and gyms should follow strict distancing and cleaning guidance.  
- Follow all General Guidelines outlined on page 6  
- Employees must go through symptom checking before every shift, including temperature; log must be kept and available for inspection by health department  
- Screen patrons upon entering the facility with a questionnaire asking about symptoms, travel, and any sicknesses in the home  
- Employees must wear face coverings; patrons encouraged to wear face coverings whenever possible  
- Limit the number of patrons in the facility at one time  
- Space or close off equipment so patrons maintain 10 feet of distance at all times  
- No team or group activities  
- Do not engage in sporting activities requiring frequent close contact with other teammates or opponents  
- Skills development and conditioning activities are allowable under social distancing guidelines  
- Staff must disinfect all equipment after each use  
- No sign-in sheets, touchpads, or touch surfaces required for entry  
- High-risk individuals discouraged from using facilities at this time | Encourage contactless payment  
- To the extent reasonable, serve grab-and-go food items  
- Any concessions/restaurant seating is compliant with restaurant dine-in recommendations | Fitness centers and gyms are open with some distancing and cleaning guidance.  
- Follow all General Guidelines outlined on page 6  
- Employees must go through symptom checking before every shift, including temperature; log must be kept and available for inspection by health department  
- Employees working within 6 feet of patrons must wear face coverings  
- Space or close equipment so patrons maintain 6 feet of distance at all times  
- Make chemical disinfectant supplies available throughout the establishment and post signs encouraging patrons to thoroughly disinfect equipment after use | Fitness centers and gyms are open with cleaning guidance.  
- Space equipment at normal capacity  
- Make cleaning supplies available throughout the establishment and post signs encouraging patrons to clean all equipment |

*Physical distance increased to 10 feet in this category to account for movement, exertion, and prolonged exposure. Physical distancing requirements will be evaluated for incremental decreases in the yellow phase based on data and milestone trends.*

</tbody>
</table>

**Precautions for Monitoring Symptoms:**
- Children and staff should stay home if they're sick
- Ensure nobody with symptoms enters a job site
- Alert local health department
- If there is a confirmed case, facility must be closed and alert local health department
- All high-touch surfaces should be cleaned and disinfected regularly
- The provider must restrict offsite activities to places or environments where social distance and proper cleaning practices can be controlled

**Shared Documents:**
- Share estimates, invoices, and other documentation electronically
- Share estimates, invoices, and other documentation electronically
- Share estimates, invoices, and other documentation electronically
- Share estimates, invoices, and other documentation electronically

**Equipment:**
- Enhanced cleaning and disinfecting
- Face coverings and gloves are worn
- Sanitize hands before and after leaving a site
- Additional hand washing stations

**Surfaces & Tools:**
- Clean and disinfect project sites, including high touch surfaces and tools frequently
- Curbside drop off and pick up
- All individuals must wash hands with soap and running water upon arrival
- Don't use toys that can't be washed and disinfected
- Children and staff are screened for symptoms
- If there is a confirmed case, facility must be closed and alert local health department
- All high-touch surfaces should be cleaned and disinfected regularly
- The provider must restrict offsite activities to places or environments where social distance and proper cleaning practices can be controlled
### Phase 1: High Risk
- Consider hosting smaller groups for high-risk individuals
- Limit the number of people in a confined area to enable adequate distancing at all times
- Face coverings are worn by students and other participants
- Participants should have their symptoms checked
- Redesign layout to increase open space
- Consider scheduling when classes are not being held or in off-peak hours

### Phase 2: Moderate Risk
- Consider hosting smaller groups for high-risk individuals
- Limit the number of people in a confined area to enable adequate distancing at all times
- Face coverings are worn by students and other participants
- Participants should check symptoms before coming
- Redesign layout to increase open space
- Consider scheduling when classes are not being held or in off-peak hours

### Phase 3: Low Risk
- Limit the number of people in a confined area to enable adequate distancing at all times
- Participants should check symptoms before coming

### Transport:
- **Campus shuttle buses**: Operates under UTA guidelines. Maintain hours of service on most routes but adjust frequency on shorter transport routes and suspend some commuter bus routes.
  - Daily disinfected of all vehicles, stations and facilities, including all surfaces that are frequently touched
  - Daily floor cleaning and wiping of all touch services on vehicles with an approved disinfecting bleach solution
  - Operators should open the doors after arriving at stations so students do not need to press button to open door; students with disabilities who need to use the ramp will need to push button to deploy the ramp
  - Post signage on advising riders to board through the rear doors; riders that need the ramp or require assistance may still board through the front door
  - Request riders avoid standing or sitting within 6 feet of operator
  - Temporary Plexiglas barrier may be placed between operators and passengers

### Student Housing
- All on-campus housing closed.

### New Normal Risk
- Daily disinfected of all vehicles, stations and facilities, including all surfaces that are frequently touched.
- Daily floor cleaning and wiping of all touch services on vehicles with an approved disinfecting bleach solution.
- Post signage on advising riders to board through the rear doors; riders that need the ramp or require assistance may still board through the front door
- Request riders avoid standing or sitting within 6 feet of operator
- Temporary Plexiglas barrier may be placed between operators and passengers

### Housing
- Housing operates under cautionary protocols and guidelines.
- Housing operates under increased cleaning regimen.

</tbody>
</table>
### High Risk
- Avoid high-touch surfaces, including tables, doorknobs, railings, elevator buttons (consider propping doors open or taking other action to minimize frequency of touch) or sanitize high-touch surfaces between each use
- Make hand sanitizer available at entry points, including elevators
- Face coverings are worn
- Install Plexiglas partition(s) at applicable points (i.e., service desks)
- Drinking fountains not in use

### Moderate Risk
- Do not congregate in groups larger than 20 and maintain social distancing (including informal lounge and seating areas)
- Avoid high-touch surfaces, including tables, doorknobs, railings, elevator buttons (consider propping doors open or taking other action to minimize frequency of touch) or sanitize high-touch surfaces between each use
- Consider having someone monitor spaces to discourage students from congregating
- Consider maintaining one-way traffic, especially in areas of campus that are generally high traffic/congestion
- Make hand sanitizer available at entry points, including elevators
- Face coverings are worn
- Install Plexiglas partition(s) at applicable points (i.e., service desks)
- Drinking fountains not in use

### Low Risk
- Avoid touching un-sanitized high-touch surfaces, including tables, doorknobs, elevator buttons
- Make hand sanitizer available at entry points, including elevators
- Face coverings are worn
- Install Plexiglas partition(s) at applicable points (i.e., service desks)

### New Normal Risk
- Laboratories and research spaces open under strict protocols.
- Only research activities that can be safely conducted with physical distancing, sanitization, and limited personnel density, along with normal guidelines, are permitted.
- Monitor symptoms of lab attendees
- Anyone who can work remotely should do so
- Accommodations should be made for high-risk personnel to work from home
- Maintain 6 feet of separation between individuals
- To avoid physical overlap, schedule lab time slots through calendaring
- Each lab should maintain a checklist of surfaces to sanitize at the start and end of each shift, including shared equipment, fridge doors/handles, etc.
- Graduate student research activities should be limited; undergraduate research activities can only be conducted remotely
- High-hazard operations should be minimized

---

### Laboratories and Research Spaces

**On-campus**

- Only mandatory employees and functions on campus.
  - Only research activities that can be safely conducted with physical distancing, sanitization, and limited personnel density, along with normal guidelines, are permitted.

- Laboratories and research spaces open under strict protocols.
  - Only research activities that can be safely conducted with physical distancing, sanitization, and limited personnel density, along with normal guidelines, are permitted.

**Laboratories and research spaces open under increased cleaning regimen.**
Appendix A: Pre-Screening Self Assessments

1. Employees should take their temperature and assess symptoms prior to coming to work.
2. If an employee is taking fever suppressing medication, their temperature should be taken beforehand.
3. Employee should conduct a general symptoms assessment including checking for: cough, shortness of breath, muscle aches and pains, decrease sense of smell/taste, and/or sore throat.
4. Employees who should not come to work if they have symptoms. Anyone who develops symptoms while at work should be separated from other individuals immediately and sent home.
5. Employees should remain home until:
   a. They have had no fever for at least 72 hours (that is three full days of no fever) without fever-reducing medicine;
   b. Other symptoms have improved (for example, their cough of shortness of breath have improved); AND
   c. At least 7 days have passed since their first symptoms appeared.
6. Let the employee know:
   a. Follow Department of Health or medical professional guidance for being tested for COVID-19 if they have any of the symptoms above.
   b. If their symptoms worsen, they should call their medical provider immediately.
7. Employees who test positive for COVID-19 must follow the directions in Appendix D.
8. Event participants can report symptoms to their coach/trainer, event organizer, etc and follow the same procedures listed under “employee.”
Appendix B: General Guidelines for Weber State University Facilities

Best Practices for WSU Facilities

- Those who are, or work with, high-risk populations, should undergo daily screening/symptom* monitoring, and be tested if they begin to experience COVID-19 symptoms. High-risk populations should take extra precautions to avoid close contact with multiple people
- Use online conferencing, email, or telephone in place of in-person meetings, even when people are in the same building
- Employees and students should not congregate in groups; if the setting involves a waiting area, individuals should wait outside or in their cars
- Encourage contactless pay options if possible; otherwise immediately disinfect transaction equipment
- Make regular announcements to remind employees and students to follow distancing guidelines. Use floor markings to mark appropriate physical distance where appropriate
- Encourage digital files rather than paper formats (e.g. documentation, invoices, inspections, forms, agendas)
- Consider what reserve supplies may be necessary to obtain (e.g., cleaning supplies, gloves or other protective equipment)
- Consider the possibility of interruptions to water or power that might force closure
- Establish and maintain open dialogue with local communities, including key vendors and suppliers, exploring contingencies and sharing appropriate decisions about foodservice, transportation, and other services
- Identify a workplace coordinator/committee who will be responsible for COVID-19 issues and their impact in the facility
- If relevant, update emergency communication plan with key contacts and backups, chain of communications, and processes for tracking and communicating; share the response plan with employees and communicate expectations
- Ensure every employee’s and student’s contact information and emergency contact details are up to date; ensure a plan is in place to reach individuals quickly
- Educate workforce and student body about the threat of the COVID-19 pandemic, what the business is doing, and what they should do to protect themselves
- Prepare for absenteeism—not only sick employees will stay home; others may need to care for the sick or children if schools close; those employees should notify their supervisors
- Provide signage at each public entrance to inform all employees and students that they should:
  - Avoid entering if they have a fever of 100.4 degrees Fahrenheit or above, cough, trouble breathing, sore throat, muscle aches and pains, sudden changes in smell or taste, or feel generally unwell
  - Maintain a minimum 6-foot distance
  - Sneeze/cough into cloth, tissue, elbow or sleeve (not hands)
  - Avoid hand shaking or unnecessary physical contact
  - Wash hands often, and for at least 20 seconds
  - Wear face coverings

Cleaning & Hygiene Guidelines for WSU Facilities

- Promote etiquette for coughing, sneezing, and handwashing; avoid touching face, especially eyes, nose, and mouth; place posters that encourage hand and respiratory hygiene
- Face coverings should be worn by employees and students, especially when difficult or impossible to maintain 6-foot distance
- Ensure adequate air circulation and post tips on how to stop the spread of germs
- When possible, discourage sharing of tools and equipment
- Make a list of high-touch surfaces requiring routine disinfecting and perform routine environmental cleaning (e.g., elevator buttons, workstations, countertops, handrails, doorknobs, breakrooms, bathrooms, common areas), either twice a day or after each use. Keep a logbook of cleaning regimen. Those cleaning should:
  - Wear gloves
  - Prior to disinfecting, clean surfaces with soap and water if soiled
  - Use EPA-approved disinfectant, industrial cleaner, diluted bleach, or alcohol solutions
- Provide disposable disinfecting wipes for employee use on high-touch surfaces; provide no-touch trash bins
- Laundry: wear gloves, use warmest appropriate water setting, dry items completely, do not shake dirty laundry, launder items that have come in contact with COVID-19 separately
- Make hand sanitizer, soap and water, or effective disinfectant readily available. Provide pop-up handwashing stations or facilities where necessary (e.g. open houses, construction sites)
- Personal Protection Equipment (PPE) should not be shared and should be disposed of properly
- When possible, discourage sharing of tools and equipment
- After using gloves, employees and students should wash their hands
- Employees and students who are sick or who appear to have COVID-19 symptoms should be separated from others immediately and sent to their residences; immediately clean and disinfect areas the sick individual visited
- Train employees/students to spot symptoms of COVID-19 and to be clear on relevant protocols
- Monitor employee symptoms, especially fever (100.4 degrees Fahrenheit/38 degrees Celsius, or above). If employees take simple medications such as acetaminophen, ibuprofen, or aspirin, they should take temperature beforehand
- Do not allow employees to come to work if they feel sick; create or maintain non-punitive leave policies so employees do not feel pressured to come to work if they are sick. Remind employees to report any illness to a manager, especially if sick with fever, cough, trouble breathing, sore throat, muscle aches and pains, sudden changes in smell or taste
- If an employee is confirmed COVID-19 positive, facilities should inform the local health department and close contacts while maintaining confidentiality; close contact employees should self-monitor for symptoms for 14 days

* Symptoms include fever of 100.4 degrees Fahrenheit or above, cough, trouble breathing, sore throat, sudden change in taste or smell, muscle aches or pains
Appendix C: Guidelines for Dine-in Restaurants Open in Orange & Yellow

Operational Practice

- Limit tables to groups of 10, preferably members of the same residence
- Must maintain 6 feet between parties at all times. Either move tables or mark off tables not to be used
- In waiting areas, a 6-foot distance must be maintained between parties, whether indoor or outdoor
- Maintain signage to remind individuals from separate parties to stand at least 6 feet apart; waiting area has floor markers to indicate proper spacing
- Hosts preferably open doors for customers and guide them to their seats to prevent traffic or congregating; hand sanitizer available at door
- Recommendation that upon entry, hosts point guests to signage that includes the following information:
  - Outlines symptoms7 and encourages that if the patron, or someone they live with, has experienced COVID-19 symptoms, to please order takeout instead
  - Recommendation for high-risk individuals8 to order takeout/delivery instead of dining in for the protection of that individual
- Manager checks each employee for symptoms before every shift with temperatures taken and asks if any member of the employee’s residence has tested positive for COVID-19 in the past 14 days. Log must be kept and available for inspection by the local health officer
- Face coverings are worn at all times and perform hand hygiene between interactions with each table
- Cups, lids, napkins and straws must be handed directly to customers by staff
- Do not place utensils on table until patron is seated
- Encourage contactless and non-signature payment; when not possible, card and payment stations must be sanitized after each use. Staff must sanitize hands between handling payment options and food/containers
- Staff avoid touching items that have been placed on the table (menus, plates, utensils, pens, cups, etc.). The table will be cleared by a dedicated staff member once all guests have left
- Dedicated staff member sanitizes the area occupied by customers upon departure including tables, menus, pens, salt and pepper shakers, etc. Consider use of disposable items if necessary
- Hand sanitizer must be available immediately adjacent to bathrooms
- Close restaurant for cleaning and disinfecting in the morning, afternoon, and evening. Cleaning and disinfecting includes all tables, chairs, door handles, floors, bathrooms, and any high-touch surfaces
- Buffet and self-serve restaurants will provide utensils, cups, plates and other service items only from the counter where food is ordered. None of these items will be accessible to the public. Buffet style restaurants will provide servers who will serve the meals from buffet to limit exposure. Patrons will not be allowed within 6 feet of the food serving area
- Stagger workstations so employees are not facing one another and are 6 feet apart
- To-go boxes, pizza boxes, paper cups, and any other paper product that touches food must be treated as food
- Staff must use gloves when handling ready-to-eat foods (including ice). Gloves are not required when handling foods that have yet to be cooked
- Indoor playgrounds in restaurants remain closed

---

7 Symptoms include fever of 100.4 degrees Fahrenheit or above, cough, trouble breathing, sore throat, sudden change in taste or smell, muscle aches or pains

8 High-risk individuals are defined as people 65 years and older, people who live in a nursing home or long-term care facility, people of all ages with underlying medical conditions, including lung disease or moderate to severe asthma, people who have serious heart conditions, people who are immunocompromised (many conditions can cause a person to be immunocompromised, including cancer treatment, smoking, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications), people with severe obesity, diabetes, chronic kidney disease undergoing dialysis, or liver disease
Appendix D: Reporting Suspected and Confirmed COVID-19 Cases

**Suspected COVID Case**
- If an individual has symptoms, or otherwise is alerted that they have been exposed to COVID-19, the individual should immediately go home (unless they are already at home) and self-isolate.
  - Contact primary care doctor, the Utah COVID hotline at 800.456.7707, and or complete a screening assessment at: testutah.com.
    - If recommended for testing, the individual will report to Public Safety (or email covid19@weber.edu).
  - If a case is suspected, it should be reported to Public Safety (or email covid19@weber.edu) to receive any additional guidance. Public Safety will work with Facilities Management and the local health department to determine building closures. Human Resources will be notified.
  - If the individual is not recommended to be tested or the test is negative, the individual should follow the guidance provided by the healthcare provider before returning to work.

**Confirmed COVID Case**
- The individual who has tested positive will immediately notify Public Safety (or email covid19@weber.edu) and will include a list of anyone they had close contact (within six feet for a prolonged period of time) with and provide a list of all spaces they visited on campus. Fellow employees should be notified (while maintaining confidentiality) and should self-monitor for 14 days.
  - Public Safety (or email covid19@weber.edu) will provide additional guidance (if the individual has been on campus in the last 14 days). All spaces visited by the individual will be shut down for at least 24 hours. Prior to reopening the space, it will be sanitized.
- **Return to Work**
  - IF POSITIVE WITH SYMPTOMS: Employee can return to work after receiving two consecutive negative COVID tests (taken within 24 hours apart) and they no longer have symptoms. If an employee cannot be retested, they can return to work after completing a pre-screening assessment and have no symptoms for 72 hours AND at least 10 days have passed since initial symptoms first appeared.
  - IF POSITIVE WITH NO SYMPTOMS: Employee can return to work ten days after their positive test as long as no symptoms have appeared and after completing a pre-screening assessment. If symptoms appear, follow guidance in the previous bullet point.
