

TOMORROW'S EDUCATORS ADVOCATING FOR MATH & SCIENCE

TEAMS

in coordination with the

TEACHER TWILIGHT SERIES

invites you to
participate in a workshop
presented by

Melissa Braaten, University of Colorado

Taking Science Teaching to the Next Level:

TEAMING UP TO USE TOOLS AND TALK TO SUPPORT SENSE-MAKING IN SCIENCE CLASSROOMS

Thursday, January 31st
4:30 - 7:00 PM
Tracy Hall Science Center
Room TY234
Dinner provided!

Melissa Braaten's research aims to understand more about how teachers learn to teach science across multiple contexts for professional learning including the pre-service preparation of teachers in coursework and field experiences, professional learning in designed settings such as professional development for teachers, and professional learning that takes place 'on the job' in the day-to-day work of teachers in schools. See ambitiousscienceteaching.org for examples of her work with science teachers.
