

Waitlist Course Event Count / Enrollment is the unweighted score.

In the example below, all courses have 100 enrolled and 10 waitlist course event count, so, the unweighted score is 0.10 for all.

The weight also factors in overall fill rate, so courses with a lower fill rate % would have a higher score.

Enrollment	Seats Available	Fill Rate	Waitlist Course Event Count	Unweighted Waitlist Score	Weighted Waitlist Score
100	100	100.0%	10	0.10	0.10
100	200	50.0%	10	0.10	0.15
100	2000	5.0%	10	0.10	0.20
