

Video Systems for Education

Greetings Wildcats!

There are multiple University-supported tools for creating, uploading, and integrating video into courses on Canvas. Each has its own strengths and shortcomings. This document is meant to show them side-by-side at a high level and suggest where each service could fit in your workflow.

There are great similarities between most of these platforms so we ask that you look through each application and find the one that best suits the needs of your courses and those of your students.

Please contact us with any questions that you have about specific functionality.

Sincerely,

WSU Online, CATS
