1. Click on “Add a new device” on the left side of the screen.

![Device screen](image1)

2. Confirm that you are the correct person adding a new device by choosing an authentication method.

![Add a new device screen](image2)
3. Choose “Landline” as the type of device you are adding.

4. Enter in your office phone number.
5. Congratulations you have set up your office phone for another DUO authentication method! You can set up preferences of each device from this page.
