MICR 4054 & 4154
BOTH NOW OFFERED FALL & SPRING!

TAKE THE CLASS YOU NEED WHEN YOU NEED IT!
FALL 2022 SCHEDULE AVAILABLE MARCH 21st

The Microbiology Department is very excited to announce that 
MICR 4054 - Microbial Physiology & MICR 4154 - Microbial Genetics 
are both taught in Fall and Spring Semesters. The maximum enrollment 
will be decreased and only 1 lab section will be offered. Eliminating the 
second lab will also allow for a waitlist, which we can then determine if 
the enrollment needs to be increased to allow those students on the 
waitlist into the course.

Microbiology majors and other programs that require these courses will 
have more flexibility in their course plans and ultimately, graduate sooner.
