

Crop Gleaning

a Weber State Sustainable Clubs Initiative

Gleaning is the art of collecting leftover crops from farmers' fields after they have been harvested. We can also glean crops that we missed out on or have extra from our own personal gardens. The Weber State Sustainability Clubs are looking to get the community involved in gleaning. Donate your extra fruit & veggies to the places below, or contact us to come pick them up. Contact us at gardenclub@weber.edu for more info.
