

# Use Smart Power Strips to Fight Energy Vampires

Even when they are turned off, energy vampires - laptops, desktop computers, monitors, & even printers - are still draining electricity and money. A single device's cost seems small, but when you have several devices the cost becomes significant.

## Office Energy Vampires

Desktop Computers  
(on, idle)

**250 KWH**/year

**\$30.00**/year

Monitors  
(LCD, sleep)

**8 KWH**/year

**\$1.96**/year

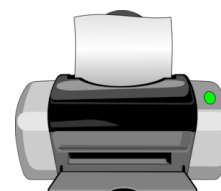

Laptops  
(on, fully charged)

**20 KWH**/year

**\$2.40**/year

Printers  
(off)

**14 KWH**/year

**\$1.68**/year

### Additional Tips:

It can be difficult to remember to turn off the surge protector every time you leave the office. No need to worry, use a smart power strip! Contact Energy & Sustainability Office at x6421 for a **free** smart power strip for your office.
